### 3 Altering the Water Cycle

#### 3.1 Introduction

#### 3.2 Precipitation
- 3.2.1 Rainfall and Snowfall
- 3.2.2 Why Is Snowpack So Important?

#### 3.3 Evapotranspiration
- 3.3.1 Potential Evapotranspiration Versus Water Balance Unknown Term
- 3.3.2 Chamber ET
- 3.3.3 Effect of Evapotranspiration on Groundwater
- 3.3.4 Effect of Evapotranspiration on Stream Water Inflow
- 3.3.5 Effect of Evapotranspiration on Pond Levels

#### 3.4 Water Storage in Residual Ponds
- 3.4.1 Estimating Pond Water Storage
- 3.4.2 Seasonal Water Level Change in Residual Ponds

#### 3.5 Groundwater Fluxes

#### 3.6 Lateral Runoff

#### 3.7 Stream Inflow and Outflow

#### 3.8 Conclusions

### 4 Beaver Loggers: Beaver Herbivory Alters Forest Structure

#### 4.1 Introduction

#### 4.2 Why Cut Wood?

#### 4.3 Beaver Morticulture and the Fate of Beaver Cut Wood

#### 4.4 Forage Selectivity

#### 4.5 Beavers and Plant Metabolites

#### 4.6 Central Place Foraging

#### 4.7 Beaver Silviculture: How Does Beaver Logging Affect the Remnant Forest?

#### 4.8 Beaver Browse on the Kabetogama Peninsula
- 4.8.1 Characteristics of the Riparian Forest
- 4.8.2 Browse Stems
- 4.8.3 Effect of Browsing on Residual Forest: Field Study
- 4.8.4 Effect of Browsing on Residual Forest: GIS Study

#### 4.9 Conclusions

### References
## Soils of Beaver Meadows

5.1 Parent Material
   5.1.1 Bedrock
   5.1.2 Glacial Till (Drift)
   5.1.3 Glaciofluvial Deposits
   5.1.4 Glaciolacustrine Deposits
   5.1.5 Alluvium and Colluvium
   5.1.6 Organic Matter

5.2 Particle Size Distribution of Beaver Meadow Soils

5.3 Field Study of Beaver Meadow Soil Profiles
   5.3.1 Histosol
   5.3.2 Arginaquoll
   5.3.3 Other Mineral Soils

5.4 Beaver Ponds and Meadows on Soil Surveys

5.5 Conclusions

References

## Vegetation of Beaver Impoundments

6.1 Beaver Meadow Plant Species
   6.1.1 Bluejoint Grass
   6.1.2 Lake Sedge
   6.1.3 Scirpus cyperinus
   6.1.4 Rubus idaeus
   6.1.5 Cattail Is Notably Absent from Beaver Meadows

6.2 Plant Communities of Kabetogama Beaver Meadows
   Field Study
   6.2.1 Wet Groups: A, B, C
   6.2.2 Carex aquatilis Core: Group G
   6.2.3 Upland Edge Groups: D, E, F, H
   6.2.4 Beaver Meadow Diversity and Succession

6.3 Plant Communities of All Kabetogama Beaver Ponds
   and Meadows GIS Analysis

6.4 Nutrient Availability in Grass and Sedge Beaver Meadows

6.5 Vertical Biomass Allocation, Light Extinction, and Nitrogen
   in Plant Canopies
   6.5.1 Greenhouse Study: Vertical Distribution of Canopy
   Nitrogen Concentration
   6.5.2 Field Study: Light Interception
   6.5.3 Combining the Light Interception and Greenhouse
   Studies

6.6 Field Fertilization Experiments
   6.6.1 Effect of Fertilization on Biomass
   6.6.2 Effect of Fertilization on Species Composition

6.7 Mouse Wars: How Voles Keep Trees Out of Beaver Meadows

6.8 Conclusions
